Introducing TerraNova

TerraNova
High Performance, Affordable Footing for Equestrian Athletes

TerraNova is the latest addition to our high-end footings, used by leading clubs and athletes in the USA, Europe and Asia.

Our latest, and most innovative polymer-coated footing, Terra Nova is formulated from high quality silica sand and fibres, and coated with a next generation viscoelastic polymer, giving unrivalled shock absorption, grip, and rebound.

TerraNova is a synthetic surface that **never requires watering and is 100% dust free**. This is ideally suited for regions that experiences arid weather conditions, like in the Middle-East, and in places where there are restrictions on water use, like in California in the USA.

Unlike the majority of synthetic footings, TerraNova is not sticky and is very stable to temperature variations. Incorporating the latest polymer technology, and not based on wax, this footing is miles ahead of the competition!

TerraNova is very competitively priced and suitable for both dressage and Jumping

Characteristics of Terra Nova:

- *Very economic and competitively priced*
- *No watering required*
- *Dust-free*
- *Non-tacky*
- *Consistent riding characteristics*
- *Manufactured from premium raw materials*
- *Reduced concussion with viscoelastic rebound*
- *Freeze-resistant and stable over a wide temperature range*

To discover more about TerraNova, and to request quotes and samples, please visit www.equestriansurfaces.com in the US, www.attwood.in in Asia-Pacific and www.aesurfaces.co.uk in the UK and Europe.

We are now on YouTube!

In addition to our social networks on facebook and twitter, we have now launched our [Youtube channel](#).

Head over to watch short video clips of what we do and to connect with us!

You can, of course, continue to engage with us on [Twitter](#) and [Facebook](#)!
